

testLogin

- Opens the login bottom sheet from MainActivity.
- Enters a test email and password.
- Clicks the login button.
- Waits for a short delay to simulate network/login processing.
- Verifies that HomeActivity is displayed after successful login.

testHomeAndNavigateToSettingsAndNotifications

- Launches HomeActivity with mock user data.
- Navigates to the Settings screen and clicks the edit button.
- Checks that EditActivity is displayed and then navigates back.
- Returns to HomeActivity and verifies the main layout.
- Navigates to Notifications, checks the layout, clears notifications, and goes back.
- Opens Event Invite Activity and ensures its RecyclerView is displayed.

testFriendRequest

- Launches FriendsActivity with a test user.
- Verifies tabs for All Users, My Friends, Sent Requests, and Received Requests exist.
- Cycles through all four fragments programmatically.
- Switches between tabs and confirms the correct titles are visible.
- Scrolls through the RecyclerView and clicks on a specific friend to simulate interaction.

testEventsNavigation

- Launches EventsActivity with a test user.

- Checks that the tab layout and ViewPager are displayed.
- Cycles through all four tabs: All Events, My Events, Event Map, Interested Events.
- Verifies that the correct tab titles are displayed.
- Scrolls and interacts with RecyclerView items in specific tabs.

testFragmentLoadsAndRvIsDisplayed

- Launches MainActivity and dynamically replaces the content with myEventsReviewsFragment.
- Verifies that the RecyclerView in the fragment is displayed.
- Performs a scroll action to ensure adapter items attach properly.

testEventMapFragmentLoads

- Replaces MainActivity content with eventMapFragment.
- Passes a test user via Bundle arguments.
- Checks that the map view within the fragment is visible.

testSentRequestsFragmentLoads

- Dynamically loads sentRequestsFragment in MainActivity.
- Confirms that the RecyclerView and SearchView are displayed.
- Simulates typing in the search bar to test filtering behavior.

testInviteFriendToEventSheetLoads

- Launches MainActivity and opens the Invite Friend bottom sheet.
- Passes test user and friend IDs.
- Verifies that the sheet's RecyclerView is displayed.

testFieldsPopulatedAndSaveButton

- Launches EditActivity with test user data and password.
- Checks that username, password, and re-enter password fields are pre-populated.
- Tests mismatch scenario for password fields, verifying error message.
- Fixes the password to match and clicks save, confirming error disappears.

testUIInitializationAndSendButton

- Launches FriendChatActivity with a test friend and chatroom ID.
- Confirms that the title TextView shows the friend's name.
- Types a message in the EditText and clicks send.
- Verifies that the EditText is cleared after sending the message.

testReviewEventsAttendedFragmentLoads

- Loads reviewEventsAttendedFragment in MainActivity.
- Confirms that the RecyclerView for attended events is displayed.

testLoginBottomSheetDisplays

- Clicks the login button in MainActivity.
- Verifies that the login bottom sheet root layout is displayed.

testSignupBottomSheetDisplays

- Clicks the signup button in MainActivity.
- Checks that the signup bottom sheet root layout is displayed.

testSplashScreenHidesAfterDelay

- Launches MainActivity.
- Waits slightly longer than the splash screen delay.
- Confirms that the main layout is visible after the splash screen hides.

testAllUsersFragmentLoads

- Loads AllUsersFragment in MainActivity.
- Verifies that the RecyclerView and SearchView are displayed.
